

Measures from U.S. Census Bureau

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates 2007-2011 to 2016-2020

Geography: Bossier Parish and Caddo Parish

The 2016-2020 ACS 5-year unweighted sample count for Caddo Parish is 13,066 (5.5% of total population), and for Bossier Parish is 6,274 (4.9%).

The American Community Survey (ACS) helps local officials, community leaders, and businesses understand the changes taking place in their communities. It is the premier source for detailed population and housing information about our nation.

- Conducted every month, every year
- Sent to a sample of addresses (about 3.5 million) in the 50 states, District of Columbia, and Puerto Rico
- Asks about topics not on the 2020 Census, such as education, employment, internet access, and transportation
- Provides current information to communities every year. It also provides local and national leaders with the information they need for programs, economic development, emergency management, and understanding local issues and conditions.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Measures from Louisiana Department of Education

Louisiana Believes Data Center by Louisiana Department of Education

Geography: Bossier Parish and Caddo Parish

Grade 6 Math less than basic achievement data: 2011 to 2021 LEAP Achievement Level Summary files

Grade 9 to 12 student dropout data: 2010 to 2019 School-District-State Annual Dropout Rate files

ACT composite scores for seniors data: ACT Scores Class of 2012 to 2021 files

Cohort graduation rate data: 2011 to 2020 Cohort Graduation and Credential Rate Summary files

Discipline Data: 2015-2016 to 2019-2020 Discipline Rates by Subgroup LEA Public with State files

Notes from Kids Count Data Center by AECF:

Suspensions are total number of suspensions, not students suspended. A student may have multiple suspensions.

Percentages are based on school enrollment. Enrollment refers to the unduplicated count of students on the rolls of the school. The unduplicated count includes students both present and absent and excludes duplicate counts of students within a specific school or students whose membership is reported by another school. An in-school suspension is an instance in which a child is temporarily removed from his or her regular classroom(s) for at least half a day for disciplinary purposes, but remains under the direct supervision of school personnel. Direct supervision means school personnel are physically in the same location as students under their supervision. An out-of-school suspension is an instance in which a child is temporarily removed from his/her regular school for at least half a day (but less than the remainder of the school year) for disciplinary purposes to another setting (e.g. home, behavior center). Out-of-school suspensions include removals in which no educational services are provided, and removals in which educational services are provided (e.g. school-provided at home instruction or tutoring).

Measures from Louisiana Board of Regents

Statewide Student Profile and Statewide Completers System by Louisiana Board of Regents

Geography: Public colleges in Bossier Parish and Caddo Parish

Enrollment data: <https://regents.la.gov/statewide-student-profile/>

- Local public college total fall enrollment

- Fall enrollment age 24 and under

- Fall enrollment age 24 and under by race

- Race percent of fall enrollment age 24 and under

Completion data: <https://regents.la.gov/degrees-and-certificates-awarded/>

- Total degrees and certificates awarded

- Local college degrees and certificates awarded to Caddo and Bossier residents

- Total degrees and certificates awarded by race

- Race percent of total degrees and certificates awarded
